

Products that DO NOT contain SESAME

Dear Customer,

This is a list of M&S products that do not contain sesame as an ingredient and these foods have been produced under controlled conditions to prevent cross contamination with this allergen.

This list of products has been divided into different food categories (such as bakery, meals and groceries) to make it easier to navigate through our ranges. This list does not contain categories such as basic fruit and vegetables, as these are the unprocessed raw products, or foods served at our fresh counters or and cafes due to the risk of cross contamination. Any of our M&S staff will be able to help you find products from this list in our stores.

Products on this list will not contain any ingredients containing or derived from sesame which includes sesame seeds (black, white and brown), sesame seed oil and tahini products

These lists are updated on a monthly basis to capture new products and recipe changes. You can request a new list directly from nutrition@marksandspencer.com or download your own copy from www.marksandspencer.com/health

If any of the above allergens are present in our products as ingredients they will be found in **bold** in the ingredients list.

Where there is a risk of cross contamination with any of these allergens an additional statement will appear in the blue box stating 'Not suitable for X allergy sufferers due to manufacturing methods'. It is important that our customers take notice of these warning statements as a detailed risk assessment has been carried out before adding this statement.

It is best to always check the ingredients list before purchasing to help identify whether foods are suitable for your diet.
